POWER PACKAGE

THE EDELBROCK TOTAL POWER PACKAGE® SYSTEM DELIVERING SEAT-OF-THE-PANTS PROVEN PERFORMANCE WITH NO GUESSWORK

To get great performance out of any engine, the components must work together. Since the early 1980s, the Edelbrock Total Power Package System has solved the parts matching puzzle for many street performance enthusiasts. Intake manifolds, camshaft kits, cylinder heads and carburetors are the core of the Power Package and can be purchased one piece at a time or in a single box with our popular Top End Kits on pages 10-11.

PERFORMER® PACKAGES STREET LEGAL* POWER FROM IDLE TO 5500 RPM

An Edelbrock Performer Power Package is designed to greatly increase performance and driveability in the low- to mid-rpm range. Your stock engine will be more efficient, with the potential for increased mileage and lower exhaust emissions. For late-model fuel injected vehicles, Performer intake manifolds offer performance improvements with emissions equipment compatibility.

PERFORMER RPM™ PACKAGES POWER FROM 1500 TO 6500 RPM

The Performer RPM Power Package has a broad operating range for streetable performance and high-end horsepower. The dual-plane, 180° design of the Performer RPM intake works with an Edelbrock carburetor for great throttle response and power up to 6500 rpm. Our RPM Air-Gap manifolds have a unique air-gap design for a cooler, denser intake charge and more power. The Performer RPM cam has more lift and duration than most street cams with acceptable low-end torque while maintaining 10"-12" Hg @ idle. Performer RPM Power Packages also help make your engine more efficient, with the potential for increased mileage.

Performer RPM heads are matched to the intake and available assembled with top-quality valvetrain parts for maximum bolt-on power. Ideal for high-performance street and weekend events, Performer RPM packages are for non-emission engines only. Because of the high rpm (above 5500) capabilities of this package, a high-volume oil pump, adjustable rocker arms & high-performance pistons with 9.5:1 compression are recommended.

Performer RPM E-Tec Power Package

435 HP 435 ft/lbs.

Performer RPM E-Tec Package dyno test results on a 350 Chevy. For more info see our Performer RPM Crate Engine on page 24.

Check our Crate Engine Section (pgs. 23-31) and Power Package Kits Section (pgs. 10-11) for the whole package in one box!

Important Footnotes

(A) Certain exclusions apply; read the listing for this part or call our Tech Line

(B) Throttle body must be used with matching EGR plate

(C) Manifolds, heads and water pumps also available with

polished finish

(D) Not for computer controlled engines

(E) Retainers and keepers available for these springs (for stock heads only)

(F) Retainers and keepers available separately

(G) Hydraulic roller cam

(H) Replacement valve springs for Edelbrock heads only-will not fit stock heads
