for 2005-10 Ford Mustang

K-Member Brace #52105
for 1994-04 Ford Mustang

Edelbrock Products are
manufactured in the USA
for unsurpassed quality.

CAMARO/FIREBIRD SUB-FRAME CONNECTORS

Edelbrock weld-in sub-frame connectors are designed to improve handling and straight line performance by eliminating chassis twist and improving weight transfer. These connectors are made with 1-5/8" diameter .120" wall steel tubing and mandrel-bent to fit the contours of the sub-frame. End brackets are laser-cut. Get the performance benefits of a more rigid chassis without reduced ground clearance. These kits follow the contour of the floor pan.

- Sub-Frame Connectors for 1970-81 Camaro/Firebird.....#5281
- Sub-Frame Connectors for 1982-92 Camaro/Firebird.....#5279

MUSTANG SUSPENSION KITS GET PRO-TOURING LOOKS AND HANDLING IN ONE COMPLETE SUSPENSION KIT

Do you want everything you need to upgrade your muscle cars suspension in one box? Then look no further... the Edelbrock line of suspension kits are what you need. With these kits, there's no guesswork about matching suspension components because we have done the work for you. Choose from 3 levels of tuning; Touring, Pro-Touring and Competition to help keep your cars power on the pavement. Each level of Suspension Kit includes the right combination of Edelbrock suspension components for the best performance tuned handling package available.

PRO-TOURING SUSPENSION KITS

Edelbrock Pro-Touring suspension kits are the ultimate upgrade for your high performance street Mustang suspension system. These Pro-Touring suspension kits are custom tailored for each application in order to provide the right combination to improve handling and reaction to road conditions, helping you plant the power to the pavement. Pro-Touring kits include Lower Trailing Arms, Adjustable Upper Trailing Arms, K-Member Braces, Sway Bars (front & rear), Sway Bar Reinforcement Plates, Sub-frame Connectors, Coil Springs, Edelbrock IAS Front Struts and Rear shocks and all of the necessary hardware and installation instructions for a complete installation.

MUSTANG STRUT TOWER BRACE FOR USE WITH EDELBROCK E-FORCE SUPERCHARGERS

Edelbrock strut tower brace for 2005-10 Ford Mustangs utilize a two-point design to reinforce the front sub-structure. The result is improved handling through quicker and more precise steering reaction. This strut tower brace is manufactured from stainless steel with a laser cut Edelbrock logo and features a brushed finish. Designed to fit all Mustang GT's, including those equipped with an Edelbrock E-Force supercharger system. Includes all of the necessary hardware for an easy installation.

MUSTANG SWAY BAR REINFORCEMENT PLATES

These plates are designed to strengthen the sway bar mounts on the 1979-93 Ford Mustangs. The OEM sway bar mounts have been known to break under extreme use and racing applications. These plates are manufactured from 1/8" steel plate and will require welding to the front sub-frame. Will not relocate or interfere with the OEM sway bar mounting location.

- 1979-93 Ford Mustang Sway Bar Reinforcement Plates.....#52107

MUSTANG K-MEMBER BRACES

Edelbrock K-Member braces are designed to stabilize the front suspension on 1979-2004 Ford Mustangs during hard cornering, allowing for improved control and handling. These braces reinforce the OEM cross member, also known as the K-Member, and help to keep the lower control arms from distorting during extreme conditions. They are currently the only braces on the market to feature an adjustable sleeve for fine tuning the preload. These braces are included with our complete Pro-Touring suspension kit #52203 and #52205.
