## UNIVERSAL RACING THROTTLE BODIES

Machined from billet aluminum, these competition throttle bodies are intended for **high output race engines making 1000 hp or more**. Using the popular 1986-93 Ford Mustang 5.0L bolt pattern, they include a throttle position sensor and will accept a Ford idle air control motor, if desired. Ideally suited for both 5.0L-based Ford and non-Ford EFI forced-induction applications.

Universal Racing Throttle Bodies	Part No.
95mm.....	3876*
105mm.....	3877*

Performer RPM Pro-Flo EFI System #3509

## INTAKE MANIFOLDS CONTINUED

### VICTOR EFI MANIFOLDS & FUEL RAILS

The new Victor EFI manifolds and fuel rails provide the hardware to convert your competition engine to Electronic Fuel Injection. The injector bosses in the manifolds have been precisely positioned and machined for **optimum fuel spray patterns and maximum power**. Universal 4-Barrel Throttle Bodies, fuel pumps and regulators are available separately from Edelbrock to complete your EFI system. The big-block Chevy Victor EFI manifold #29275 includes a 1" spacer to provide throttle linkage-to-fuel rail clearance.

Victor EFI Manifolds	Part No.
For Small-Block Chevrolet (based on Victor E #2978).....	29785*
For Big-Block Chevrolet (based on Super Victor #2927).....	29275*
<b>Aluminum Fuel Rails for use with standard injectors with 2.650" O-ring spacing</b>	<b>Part No.</b>
Small-block Chevy (for use with #29785).....	3630
Big-block Chevy (for use with #29275).....	3633

## THROTTLE BODIES

### UNIVERSAL 4-BARREL THROTTLE BODIES

These 4-barrel throttle bodies bolt directly to standard square-bore or 4500 Series carb mount flanges for **competition electronic fuel injection systems** based on our Victor Series manifolds (see above). Fully machined by Edelbrock, they are assembled/calibrated by Magneti-Marelli USA. TPS and Delphi/GM IAC motor are included. Standard air cleaners will fit.

Universal 4-Barrel Throttle Bodies	Part No.
For Standard Square-Bore Carb Mount Flange (1.75" throttle bores, 1000 cfm).....	3878*
For 4500 Series Carb Mount Flange (2" throttle bores, 1600 cfm).....	3879*
For 4500 Series Carb Mount Flange (2-1/4" throttle bores, 2000 cfm).....	3888*

### VICTOR RACING THROTTLE BODIES AND ADAPTERS

Based on our 5.0L Mustang throttle bodies, the Victor 70mm and 75mm race throttle bodies can be easily adapted to a wide variety of applications. We eliminated the idle air motor mount and all unnecessary vacuum tubes, making these throttle bodies **especially well suited for boosted applications**. The throttle arm has a cable wheel with multiple take-off points. They are cast and fully machined by Edelbrock, then assembled by Magneti Marelli and come complete and ready to run with a throttle position sensor installed and pre-set. These throttle bodies can be adapted to a number of applications using our 1/2" thick spacer/adapters. Intake port matching will be required.

Victor Racing Throttle Bodies and Adapters	Part No.
70mm Throttle Body.....	3811*
75mm Throttle Body.....	3812*
70mm Spacer/Adapter for Honda and Acura.....	38112*
75mm Spacer/Adapter for Honda and Acura.....	38122*
70mm Universal Spacer/Adapter (undrilled).....	38113*
75mm Universal Spacer/Adapter (undrilled).....	38123*

## MULTI-POINT FUEL INJECTION

### PERFORMER RPM PRO-FLO EFI SYSTEMS FOR CHRYSLERS

Now Mopar owners can benefit from an Edelbrock multi-point electronic fuel injection system. With Edelbrock EFI you get **excellent throttle response throughout the rpm range** and great fuel economy with incredible power. Systems include an assembled induction module (aluminum manifold, 4V throttle body, fuel rails and injectors), ECM with interchangeable chips, wiring harness, all required sensors, Calibration Module, billet distributor and fuel pump. Using a speed/density system for control over fuel and spark, all Edelbrock EFI Systems provide total engine control... without a laptop computer.

Performer RPM Pro-Flo EFI Systems for Mopars	Part No.
For 1961-79 Chrysler 413/426 Wedge/440.....	3509*
For 1964-91 Chrysler 340/360 (and 318 with 340/360 heads).....	3526*
